- Problem solving
- Clean Code Practices
- Critical Thinking
- Rapid Technology Adoption
- Highly adaptable to the AI tools

LANGUAGE

- Burmese (Native)
- English (intermediate)

ABOUT ME

I am a highly motivated self-taught Web Developer who began my journey in early 2024. Despite having a non-traditional educational background, I possess a strong aptitude for rapid learning and a deep passion for coding. I am a dedicated problem-solver who spends the majority of my time honing my technical skills and building projects.

I am currently seeking an entry-level position or internship to gain hands-on experience in a professional environment. I am eager to contribute my energy to a team, learn advanced technologies, and grow alongside industry experts. I am fully committed to continuous learning and am ready to take on new challenges in the tech world.

MY EXPERIENCE

Although I am a Junior Developer without prior commercial experience, I have actively built several personal projects during my self-learning journey. You can explore the languages and frameworks I use by visiting my personal portfolio website. Since my site is currently hosted on a free tier platform, you may occasionally need to use a VPN to access it smoothly. I would truly appreciate your time in reviewing my work.
